

# Signature Healthcare warns of possible scam phone calls

Signature Healthcare is alerting the community to a phone scam targeting our area. Scammers are posing as hospital and clinic staff, using a technique called “Caller ID spoofing” to make their calls appear to originate from our organization.

This nationwide scam attempts to trick patients into disclosing confidential information. We urge you to exercise caution. Never provide sensitive information over the phone unless you initiated the call directly to Signature Healthcare. If you have any doubts about the validity of a call, please hang up and contact the hospital or your doctor’s office directly using a known, verified number.
